CMPE 354 Lab 4

Nested Queries and queries containing aggregates

To be done in groups of two: pick your partner!

In this lab work, you will use the database you created in Lab 2 and write queries do the following *before* coming to the lab.

a. Find all students of Yiltan Bitirim (those who took any course he taught)
b. Find the students who have NOT taken any course taught by Marifi Guler for the Spring 2018 semester
c. Find the total number of students of Ekrem Varoğlu
d. Find the section with the most number of students
e. Find all the prerequisites of given course (XXXX)
f. Find all the courses that have NO prerequisite
