

## **Instructions**

1. All the students must actively take part in preparing and submitting the project.
2. Students are **not allowed** to change their group.
3. All tasks of the project should be prepared using a computer.
4. **Late submissions** will not be accepted.
5. **Copying (Full/Part) or plagiarizing this work from some other groups is strictly prohibited and any such act shall result in an award of 0 (zero) marks for the project.**
6. **Last date for submitting the first phase of the project is on or before 25-May-2018 by 4.00 p.m.**

### **Deliverables:**

**Hard-copy** of the report should be delivered to your instructor's office (CT117) and the **soft-copy (report and script)** should be sent to [sebnem.coban@emu.edu.tr](mailto:sebnem.coban@emu.edu.tr) address on or before the date stated above.

## Table of Contents

1. Introduction.....	Page#
1.1. Project Scenario .....	
2. Entity Relationship Diagram .....	
3. Relational Model .....	
4. SQL.....	
4.1. Create table statments .....	
4.2. Insert statements.....	
4.3 Update statements .....	
4.4. Delete statements.....	
4.5. Alter table statments.....	
4.6. Drop table statments.....	
4.7. SQL Queries.....	
5. Conclusion.....	
6. References .....	

You are to create a script that will include all SQL (DDL, DML, DCL, TCL) commands that should cover the following:

- Drop table statements
- Create table statements (all tables should be created)
- Alter table statements (3 – 5)
- Insert statements (at least 3 into each table)
- Update statements (at least 3)
- Delete statements (at least 2)
- SQL Queries (at least 3)
