Textbook(s):		. .		_						
	n, Machine Design, An Integrate				- 4h					
_	nas, J. Keith Nisbett, Shigley's	Mechanic	al Engine	ering Desig	gn, 9 th Ed., Mc	Graw				
Hill										
e i	n: The course covers fundamen			0	U	0				
	materials selection, stress, strain				e theories, the o	concepts				
of reliability and safe	ety, tolerances and fits; and intr	oduces de	sign guide	elines.						
Prerequisite(s)	MENG222									
Type of Course	Required	Selected	d Elective		Elective					
Student Outcomes										
1 an ability to iden	tify, formulate, and solve comp	lex engine	eering pro	blems by a	pplying					
principles of eng	ineering, science, and mathema	tics								
2 an ability to appl	an ability to apply engineering design to produce solutions that meet specified needs with									
	consideration of public health, safety, and welfare, as well as global, cultural, social,									
	environmental, and economic factors									
2 1.114	an ability to communicate officially with a range of cudiences									
	an ability to communicate effectively with a range of audiences									
-	bility to recognize ethical and professional responsibilities in engineering situations and									
	nake informed judgments, which must consider the impact of engineering solutions in global,									
economic, enviro	onmental, and societal contexts									
5 an ability to func	ction effectively on a team whose	se member	rs togethe	r provide le	adership_crea	te 🗖				
2	nd inclusive environment, estab		U		A -					
		-	-							
-	elop and conduct appropriate ex	perimenta	ation, anal	yze and int	erpret data, an	d 🔀				
use engineering	judgment to draw conclusions									
7 an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.										

Course Learning Outcomes				Student Outcomes						Assessment		
			1	2	3	4	5	6	7	Percentages		
1		Understand strength, safety and reliability goals for designing specific machine components.										
2	Select suitable material for different mechanical parts and applications.		x									
3	Understand the importance of tolerances and fits in critical design applications.		x							Milton E 200/		
4	Understand life of a material under static and dynamic loading.		x							Midterm Exam:20%Final Exam:40%Project:40%		
5		engineering software for analysis of stress- navior of machine elements.	x					x				
6	Get familiar with codes and standards in relation to machine elements.								x

Important Notes Regarding the Course: University rules and regulations are applied to this course. For details, please see <u>http://mevzuat.emu.edu.tr</u>

Exam and Quiz Policy

The midterm and final exams are OPEN book.

Makeups

- 1. There is no make-up or reset for the Quiz and Labs.
- 2. A student who fails to sit for an examination for a valid reason is given a make-up exam. Within three working days after the examination, students who wish to take a make-up must submit a **written statement** to the course instructor explaining the reason(s) for his/her request.
- 3. Eligibility to take a Make-Up Exam:
 - a. Student must contact the Instructor immediately within "**three working days**" after the examination when (s)he has missed the mid-term exam or final exam and to discuss with the faculty about the date and time to take the make-up exam.
 - b. Student must secure a "**Make-Up Exam Form**" from the department Office or from instructor website & fill-out the Form. For each Make-Up Exam, please use separate Form.
 - c. Student must secure the approval from the instructor for taking the Make-Up Exam.
 - d. Failure to take the Make-Up Exam at the agreed date and time will lead to a "NG" Grade for the Make-Up Exam, midterm or final.

NG Policy

- 1. "NG" Nil Grade/ Failing from Absenteeism: Students who do not comply with the required level attendance and/or not fulfilling the requirements for the evaluation of the course are given the "NG" grade by the Instructor of the Course based on the criteria determined by the Faculty/School Academic Council. Students are informed about the criteria for receiving the "NG" grade by the related course instructor at the beginning of the semester. "NG" grade is included in the computation of GPA and CGPA.
- 2. Student attendance is monitored and assessed by the course instructor. A student who fails to meet the requirements of a course or who is absent more than the limit specified by the Faculty is considered to be unsuccessful in that course.
- 3. Students who do not attend any of the above assessment activities (such as mid-term exam, final exam, lab exam, design project report etc.) will be given NG (Nil Grade).
- 4. Late Submissions of the Assignments, Lab Reports and Project will be graded as zero.

Important Notes

Late submission of Homework or Project will not be accepted and evaluated.

Appeals

Any appeal against the marks of any assessment component must be made to the course instructor within one week following the announcement of the marks. Any appeal concerning a semester grade must be made to the course instructor no later than the end of the registration period of the following semester.
